

TURBO-AIR NX 8000

Turbokompressor

Die Konstruktion des TURBO-AIR® NX 8000 baut auf umfassenden technischen Verfahren mit fortschrittlichsten technologischen und Berechnungsmethoden auf. In seiner Klasse zählt der TURBO-AIR NX 8000 zu den effizientesten Maschinen und mehrere seiner neuen Konstruktionsmerkmale wurden zum Patent angemeldet.

Eigenschaften

FEATURED IMPROVEMENTS

- Integrated structural sub-base also serves as lubricant reservoir, drive motor foundation, and mounting platform for lube system accessories, including the aux oil pump, oil heater, and oil cooler.
- Optimized stage and gas passages utilizing computational fluid dynamics (CFD)
- OEM-optimized cast-in-water manifold, with provisions for optional patent-pending integral trim valves
- Interchangeable intercooler bundles

ISO CERTIFIED CLASS 0

Our MSG TURBO-AIR centrifugal compressor product line has been engineered to produce oil-free air for more than 60 years. This certification officially acknowledges the ability of our compressors to produce 100% oil-free air, providing our customers with enhanced quality assurance.

LOW TOTAL COST OF OWNERSHIP:

Over time, the energy required to power a compressed air system is the largest cost associated with a compressor; particularly in today's fluctuating energy markets. That is why, to accurately determine the return on your investment, it is important to consider the total life-cycle cost of operating the compressor, including the initial investment, energy consumption and maintenance costs.

As the chart below demonstrates, the MSG TURBO-AIR NX 8000 provides some of the lowest total life-cycle costs of any compressor.

The power savings delivered can significantly speed up the payback on your initial investment, and the savings continue to build the more you use the MSG TURBO-AIR NX 8000.

Life-Cycle Cost Comparison

(over 10 years of operation at 80% loaded)

Modellspezifikationen

Specification	Metric	Imperial
Standard Input Power	750-1700kw	1000-2250hp
Discharge Pressure	2.5-14.5 barg	35-210psig
Inlet Flow	135-300 m3/m	4850-10800 CFM
