

Upgrade - Aerodynamic Enhancements for Centrifugal Compressors

We understand that requirements for pressure and flow can change based on current needs. That is why our compressors are designed with easily changeable aero components that can completely re-rate your compressor to accommodate new process requirements, saving you money on having to buy a new compressor.

Features

Enhancements Include:

- Impellers — Custom designed five-axis impellers for maximum efficiency
- Inlets — Custom inlets contoured to match new impeller design
- Diffusers — Custom low solidity diffuser to match the new impeller design
- Scrolls — Ability to increase or decrease sizes for different flow requirements
- Intercoolers — Existing intercoolers may be upgraded to reduce pressure drops and refine approach temperatures
- Re-rates - Compressors can be re-rated to meet higher or lower pressure/flow requirements
