

X4I Systems Controls

As much as 20% to 60% of the energy used to operate compressed air systems is wasted! This is primarily due to operating more compressors than necessary, operating the wrong combination of compressors and/or maintaining elevated system pressures. Ingersoll Rand X-Series System Automation eliminates waste by managing up to four (4) positive displacement compressors simultaneously. This can include compressors of different capacities, different types, Ingersoll Rand Nirvana 7.5-40 hp (5.5-30 kW) VSD compressors and in any combination. The X4I has basic control functionality and universal connectivity and will work with your existing compressors, from Ingersoll Rand or any manufacturer, to improve operating efficiency, reduce energy cost and eliminate waste.

Features

- Single point pressure control
- Programmable sequence, schedule and pressure profile
- Priority sequence control
- Multiple pressure profiles
- Realtime programming
- Anti-cycling control
- Standby and system pre-fill functionality
- Power outage restart

Technical Information

- Controls up to 4 rotary or reciprocating compressors
- Controls IntelliSys, non-IntelliSys and non-Ingersoll Rand Compressors
- Controls from one common system pressure
- Universal interface: 1 per compressor
- Manages Nirvana 7.5 - 40 hp (5.5 - 30 kW) VSD compressors
- NEMA 12 / IP54 Enclosure
- 50/60 Hz standard

About Ingersoll Rand Inc. Ingersoll Rand Inc. (NYSE:IR) driven by an entrepreneurial spirit and ownership mindset, is dedicated to helping make life better for our employees, customers and communities. Customers lean on us for our technology-driven excellence in mission-critical flow creation and industrial solutions across 40+ respected brands where our products and services excel in the most complex and harsh conditions. Our employees develop customers for life through their daily commitment to expertise, productivity and efficiency. For more information, visit www.IRCO.com.
